DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I (Functional Relationships):

- a. Species 1 (to produce the target distance): Claims 25-35.
- b. Species 2 (to produce the desired ball trajectory): Claims 36-45.

If Species 1 of group I claims is elected (Claims 25-35), a further election is required.

Group II of claims 25-35 (Type of functional relationship):

- a. Species 1 (Tempo is the same for each club): Claims 26-27.
- b. Species 2 (Tempo is linear and not the same): Claim 27.
- c. Species 3 (Tempo is polynomial): Claim 28.
- d. Species 4 (Tempo is power-law relationship): Claim 29.

If Species 2 of group I claims is elected (Claims 36-45), a further election is required.

Group III of claims 36-45 (Type of functional relationship):

- a. Species 1 (Tempo is the same for each club): Claims 37-38.

- b. Species 2 (Tempo is linear and not the same): Claim 38.
- c. Species 3 (Tempo is polynomial): Claim 39.
- d. Species 4 (Tempo is power-law relationship): Claim 40.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was not made to Elizabeth E. Nugent on 10 September 2004 to request an oral election due to the complexity of the restriction requirement. As such an election was not made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steve Blau whose telephone number is (703) 308-2712.
